HELP!
Undercar

81050 (2)

Axle Shaft Lock (C-Clips)

GM. Replaces lost or damaged rear axle locks. Worn or damaged locks should be replaced to ensure proper axle lock-in. Axle locks should be replaced whenever axle work is performed. Available in two sizes to provide a proper fit.

81031 (2)

Locking Washers

E/F-Series Ford Trucks w/Dana rear axle 1980-56.

81056 (2)

Pinion Crush Sleeves

Ford cars and trucks 2003-65.

D

81057 (2)

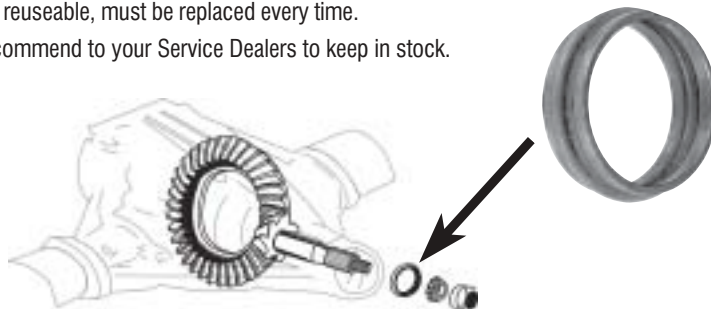

Pinion Crush Sleeves

GM cars and trucks 2001-76. 8.50" thru 8.75" diameter ring gear.

Pinion Crush Sleeve

- Needed when servicing differential. Not included with new ring or pinion.
- Not reuseable, must be replaced every time.
- Recommend to your Service Dealers to keep in stock.

81058 (2)

Pinion Crush Sleeves

GM cars and trucks 2001-76. 7.50" thru 7.625" diameter ring gear.

81055 (2)

Pinion Crush Sleeves

Dodge and Plymouth Truck 2003-75. 8.75" ring gear with #489 differential casting.

81053 (1)

Pinion Nut

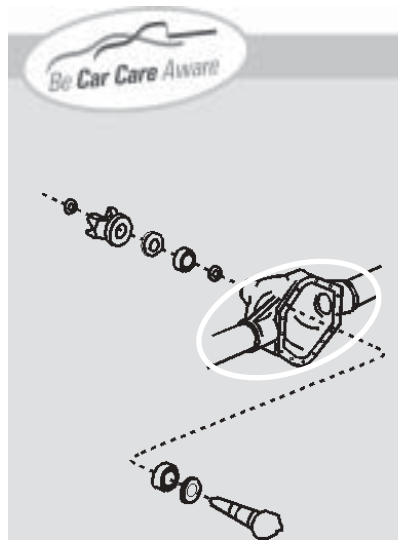

GM 1995-61. Prevailing torque style. 7/8-14.

81048 (1)

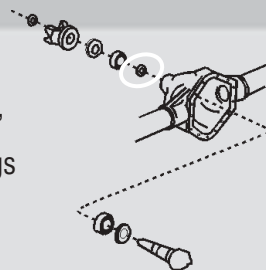

Differential Shaft Lock Bolt

Fits GM vehicles 1994-90, Ford 2003-80, Ford cars and trucks 2003-80. Retains pinion shaft. Must be removed to perform rear differential work or when replacing rear axle shafts. Bolts break, wear out or are often misplaced.

Pinion collar sleeves can only be "crushed" once. Always replace whenever the bearings or seals are replaced. Often, several are required when setting ring pinion backlash.

When removing Differential Cover, always replace the gasket. Don't forget to include friction modifier for limited slip differentials to prevent chatter when going around corners.

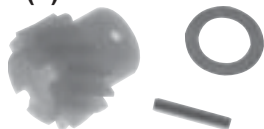

Distributor Gears

Distributor Gear Applications,
pages 317-318

HELP!
Underhood

- Teeth on gear round off and wear with age causing inaccurate engine timing and decreased performance.
- Distributor are gears not available separately from dealer. Must purchase entire distributor.

90450 (1)

Chrysler slant 6-cylinder engine. Includes locking pin and washer 1987-60.

90453 (1)

Ford 3.0L 1995-86.

90454 (1)

Ford 4.9L 1996-65; 240 1974-65.

90455 (1)

Ford 3.8L, 5.0L, 5.8W 1995-69.

90457 (1)

Ford 351M, 400, 429 & 460 1989-64.

After properly installing gear and aligning pin hole in gear with hole in shaft, choose the appropriate drill bit to finish drilling out the opposite side of the pin hole in the new gear. Remove any debris created in this process.

Securely support gear shank to install the roll pin avoiding damage to critical surfaces. Once the roll pin is installed, it should be lightly staked in place using a center punch.

NOTE: After gear installation check that shaft end play meets manufacturer's specifications. Failure to do so may result in distributor gear, camshaft or other damage.
